

OpsMx Intelligent Cloud

*The Intelligent Continuous Delivery Platform
Built on Spinnaker*

OpsMx Intelligent Cloud is the fastest path to automated deployments. OpsMx Intelligent Cloud provides OpsMx Enterprise for Spinnaker (OES) in a fully hosted and managed service, so you can create your production-ready CD solutions in minutes. Trust the reliability of Spinnaker and enjoy extra scale, security, ease-of-use, and intelligence of OpsMx Intelligent Cloud.

KEY BENEFITS

- Faster time to Deploy**
 Start using SaaS Spinnaker for software delivery in less than 1 hour
- Simple and Easy with Zero Hassle**
 No worries to install, maintain, or upgrade infrastructure
- Safe and Secure with High Data Security**
 Isolated environment for customers with secure access and storage of data
- High Availability and Scalability**
 99.9% availability with auto-scaling as your application delivery requirements grow

“ Cisco has improved release speed for key applications from once per month to multiple times per day ”

Anil Anaberumutt
IT Architect, Cisco

OpsMx Intelligent Cloud Features

OpsMx intelligent cloud offers features to modernize software delivery by releasing faster with greater confidence and reduced risk.

Automated workflows

Deploy applications through automated pipelines without any scripts. Automatically update monoliths, microservices, and any required infrastructure changes with confidence. Securely deploy as many changes as you need, as fast as you need.

Fully hosted and securely managed

We handle the entire infrastructure and provide "no-excuses" support including best practices, proactive troubleshooting and 24*7 monitoring. Work on your own with a complete self-service interface, or rely on our experts to help.

Immediately scalable, highly available

With OpsMx Cloud, you can scale as needed, deploying a nearly unlimited number of changes. We handle the architecture, operation and management of your CD platform, including deploying to any availability zone on any cloud.

Multicloud and on-prem deployments

Leverage ready-to-use support for on-prem, hybrid and multi-cloud deployments. Use our unique architecture to deploy across security zones. Utilize canary, blue-green and highlander strategies with automated rollbacks.

Automated risk assessment

Identify potential errors by automatically analyzing metrics, logs, and test results using AI/ML. Reduce the burden on senior engineers to validate releases, without increasing risk. Automatically apply policies and avoid production errors.

Traceability and insights

Automatically trace artifacts through all pipelines to increase security. Make better decisions using real-time 360° visibility. Remove bottlenecks by sharing best practices across your entire deployment process.

Trusted by Leading Enterprise

About Us

OpsMx is a leading provider of Spinnaker for enterprise usage. OpsMx offers 24x7 support for Open source Spinnaker and Enterprise extensions for security, application onboarding, and continuous verification. OpsMx has offices in the United States, Europe, and India.
